The City of Colton is Leading the Way for a Clean Energy Future with Solar.

Colton, Calif. — (August 13, 2013) —The City of Colton is Leading the Way for a Clean Energy Future with Solar. The City of Colton Electric Utility will be re-opening its residential solar rebate program. Colton’s residential solar rebate program will provide homeowners an additional incentive to install a photovoltaic solar system that will provide clean energy for their homes. Rebates will be limited to installations up to 3 kW in size and will be contingent on the completion of an energy audit. A 3kW sized system could potentially qualify for a \$5,500 rebate.

“Solar rebates are a great opportunity for our residential customers. It will lower resident’s monthly electrical bills while helping our City meet AB32 goals for greenhouse gas reductions,” said City Manager, Stephen Compton.

The solar rebate program was established to meet Senate Bill 1, “The Million Solar Roofs Bill”.

The City of Colton’s goal is to install up to 4 MW of solar energy by 2018.

The solar rebate will be available for residential customers beginning **September 3, 2013**.

Funding is on a first come, first served basis. Funding is limited; the program will close once all funds are exhausted. To apply, Colton residents must have an energy audit completed to insure

Colton Electric Utility was established in 1887 and continues to be committed to provide safe and reliable electric services to our existing customers. Today Colton Electric Utility provides their services to over 16,000 residential customers. More information available at www.ci.colton.ca.us/ or by calling 909-370-5104.

energy efficient measures are installed throughout their home before they are eligible for a rebate. Applications will be available online at www.coltononline.com.
