Data Footnotes:

(1) The mean of the first third of the wage distribution is provided as a proxy for entry-level wage.

(2) For some occupations, workers may not work full-time all year-round. For these occupations it is not feasible to calculate an hourly wage.

(3) An estimate of employment could not be provided.

(4) The "Mean Relative Standard Error" is a measure of the relative precision of the wage estimate. A low number denotes relatively high validity.
